

Helping Homes, The Planet, And Your Pocket.

April 17, 2027

About the Festival

RCSF is a free annual event that brings together communities, experts and innovators to explore *practical, sustainable living solutions that benefit both the planet and the household budget*. The event's core themes are Energy and Environment.

RCSF was first run in 2024, and was previously known as the 'Riddells Creek Enviro-Energy Expo'. It has since rebranded to the *Riddells Creek Sustainability Festival* for the 2027 event, and beyond.

RCSF is run by volunteer members of *Riddells Creek Cool Changes*, which is an action group of Macedon Ranges Sustainability Group.

RIDDELLS CREEK Sustainability Festival

A Voice for Community

In 2022, Macedon Ranges Shire Council consulted the Riddells Creek community regarding support for and implementation of the broader Council goal of net-zero emissions by 2030.

From this consultation, foundational values and goals for the town emerged. These were: the desire for Riddell to be a well-connected community, and to curb our local emissions.

In response to this, the *Riddells Creek Sustainability Festival* (previously the Riddells Creek Enviro- Energy Expo) was created, and is run each year to maintain commitment to these goals.

Testimonials

"It was certainly the best organised community run Expo that I have been to, great venue, a large team of outstanding and helpful volunteers, and excellent AV support. I have spoken at similar but smaller environmental festivals over the last decade or so in other locations across Victoria. None has been as good as your Expo on Saturday !!"

Emeritus Professor David Karoly, The University of Melbourne -

"Last year we sat in an EV at the expo. This year we turned up in our own EV. Loved seeing the diversity of what was available."

Festival Survey Respondent -

"It really was a standout event"

Annabel Sides, Green Planet Sport -

More Testimonials

"We had a great time at the event, at our stand we had 84 community engagements, some fantastic conversations were had and feedback received. We look forward to supporting and being involved again next year!"

Resource Recovery, Macedon Ranges Shire Council -

"The expo had really impressive speakers, and a diversity of topics that would have engaged different audiences"

Festival Survey Respondent -

"Relaxed atmosphere and knowledgeable speakers and diverse experts to help with future thinking and simple climate change living improvements."

Festival Survey Respondent -

Donate/Sponsor

*Our upcoming Festival on **17 April, 2027** is designed to bring people together, provide education about renewable energy, foster environmental stewardship, and create long-lasting responsible action within the Macedon Ranges.*

We believe wholeheartedly in the generosity and strength of community, with community access as a core value of the Festival. So, rather than charge a fee to stallholders and attendees, we instead ask for your support through a voluntary donation, or through ongoing sponsorship.

Through your support, we will be able to keep the Festival accessible for years to come.

In-Kind Support

We welcome any in-kind support you wish to provide, including (but not limited to) materials, equipment, services which reduce Festival costs, and services which lessen the Festival's overall environmental impact.

- **Equipment** - AV/IT, podium, tables, chairs, marquees.
- **Venue hire** - (future years).
- **Printing** - flyers, posters, town signage.
- **EV** - to power catering van.
- **Plants** - to decorate the venue.
- **Volunteers** - from your organisation to help with event set up and pack down.
